Megha Engg (MEIL) **GET, Engineer**		**Adani Group** **Project Engineer**	

💼 Professional Experience

Cognizant – Hyderabad   **Team Manager - Transitions (May 2022 to Dec 2024)**

Client: *One of the leading telecommunications companies in the United States.*

Key Result Areas:

- **Manage end-to-end Agile project delivery,** from refining high-level design to coordinating product launch, ensuring iterative development and stakeholder alignment**.**
- **Lead and facilitate ART (Agile Release Train) ceremonies** to ensure alignment, drive continuous improvement, and foster cross-team collaboration.
- **Coordinate and manage program execution** to ensure timely feature delivery, resolve dependencies, and address risks effectively.
- **Organize and facilitate Agile workshops** to enhance team engagement, drive collaboration, and optimize workflow performance.
- **Drive resolution of impediments and blockers** by collaborating with teams and stakeholders to ensure smooth execution and delivery of value.
- **Coach leadership in agile methodologies**, using independent judgment to drive team collaboration and continuous improvement.
- **Mentor and guide teams in Agile methodologies**, fostering a culture of continuous improvement and collaboration, leading to a 30% increase in delivery efficiency and a 25% reduction in time-to-market.
- **Facilitate Agile kickoff meetings with stakeholders** to align on project vision, gather diverse perspectives, and ensure a unified and collaborative start to the project.
- **Participate in Quarterly Business Review (QBR) meetings and subsequent PI planning events** to align business objectives with program increment goals and drive strategic execution.
- **Support and coach Scrum Masters and Product Owners** in Agile practices, helping them enhance their effectiveness and the team's performance.

💼 Previous Experience

Adani Group   **Project Engineer (Feb 2016 to Apr 2022)**

Project: *Diversified projects in Adani Group (Including HOWE Projects) located strategically in India.*

Key Result Areas:

- **Oversaw the implementation of Agile methodologies** in a new manufacturing facility, integrating SAP modules and project management software to streamline operations and enhance efficiency.
- **Engaged with Oracle to customize Agile project management platforms**, including Oracle Aconex and Oracle Primavera, leading to a 20% improvement in real-time project tracking and collaboration.
- **Acted as the Scrum team and stakeholder's liaison**, ensuring a seamless handover and takeover of projects.
- **Guided the Product Owner in the effective adoption of the Scrum process** and ensured their availability as required.
- **Worked closely with and assisted the Product Manager** in updating the backlog and user stories effectively.
- **Ensured all Scrum events** occurred as scheduled, maintaining a positive and productive atmosphere while adhering to timebox constraints.
- **Monitored project progress** and ensured that developers updated Jira daily.
- **Evaluated Agile KPIs**, leading to a 22% improvement in sprint completion rates, a 25% reduction in cycle time, a 10% increase in team productivity, and a 15% enhancement in product quality.

💼 Previous Experience

Reliance Industries Ltd   **Manager (Mar 14 to Jan 16)**

Project: *J3 Project - The J3 Project is an expansion of the world's largest oil refinery, designed to enhance capacity and efficiency.*

Key Result Areas:

- **Led the agile implementation of various SAP modules** for Refinery Off-Gas Cracker Systems across ISBL, OSBL, and tank farms, ensuring iterative delivery and continuous improvement.
- **Trained the team on effective adoption of Agile methodologies**, including Scrum and Kanban practices.
- **Facilitated internal and external communication**, enhanced transparency, and streamlined information flow
- **Managed stakeholders effectively**, supporting businesses in making informed decisions based on Agile metrics.
- **Ensured adherence to the Scrum framework** by issuing invitations for daily scrums, sprint reviews, and planning sessions.
- **Generated daily progress reports** in Smart Plant Spoolgen Plus (part of the Reliance Project Management Group website) and managed vendor relationships, including all billing-related activities
- **Managed end-to-end delivery with Agile principles**, communicated project plans and status updates, and set and managed expectations.
- **Monitored resource utilization**, timeliness, effort variance, productivity, and quality, leading to improved efficiency, reduced costs, and enhanced project outcomes.
- **Streamlined the procurement of materials** through SAP for various J3-related sites, resulting in measurable improvements such as a significant reduction in lead times and enhanced overall supply chain efficiency.

Megha Engineering & Infra Ltd.   **GET & Engineer (Jan 12 to Feb 2014)**

Key Result Areas:

- **Acquired in-depth knowledge of diverse project deliverables** at various stages, improving my ability to effectively oversee and fulfill project requirements.
- **Managed effective communication** with project stakeholders and the project manager, ensuring timely updates and alignment on project objectives and progress.
- **Supported the IT team** in implementing various processes within the organization, including ERP system integrations and workflow automation, ensuring smooth execution and enhanced operational efficiency.
- **Worked closely with the Engineering teams** to process and validate designs and drawings, enhancing design accuracy and expediting project milestones
- **Served** as a Planning Engineer, consistently updating and managing status reports across multiple projects to ensure accurate progress tracking and timely project delivery.
